EDUCATION

St. Lawrence University <i>Bachelor of Science in Computer Science and Physics</i>	Canton, NY Aug. 2025 – May 2029
Li Po Chun United World College <i>International Baccalaureate Diploma Programme</i>	Hong Kong, China Aug. 2022 – May 2024

EXPERIENCE

Mathematics Calculus 3 Teacher Assistant <i>St. Lawrence University</i> Developed and printed 3D Geometry models in Blender and Bambu Lab software for Calculus 3 Class visual learning	Jan. 2026 – May 2026 Canton, NY
Storage Manager Intern <i>BCC STI</i> - Managed a team of employees on storage management, event rigging, and infrastructure tear-downs for events hosting up to 10,000 people - Implemented AI storage sorting system using Git, Python, and Supabase to help volunteers retrieve items quicker	July 2024 – Aug. 2025 Moss, Norway

PROJECTS

JimBo <i>Python, Fast API, Flutter, PostgreSQL, SupaBase, Firebase, Railway, ...</i> - Designed a complex frontend iOS app using Flutter to give colourful and smooth animated UI/UX - Programmed a Backend server hosted on Railway with Python and Fast API for AI and Data transfer - Deployed an app on the App store that uses AI to aid users with gym exercises selection and XP system for gamification	Aug. 2025 – Present
Roya Link <i>Python, Fast API, PyTorch, TorchAudio, Pydantic, Transformers, ...</i> - Built a frontend Google Extension using JavaScript, HTML, and CSS for Language selection, URL extraction, timed video pausing, and audio playing - Developed a Backend server that ran on Vercel with Python, Fast API, and PyTorch for transcription retrieval, audio segmentation, AI translation generation, AI audio generation, automatic audio timing, and automatic speed selection - Created a Google extension that translates YouTube audio into any language by generating translation audio and timing the sentence playback to match the video. Over 2000 users for the first 3 months - Participated in the Hult Prize Start-up competition, placed 1st in Earlham College, and placed top 30 in the US	Jan. 2025 – May 2025
Summer Projects 2026 <i>Python, Fast API, HTML, Git, React, Flutter, SQLite, FAISS, ...</i> - Dedicated every week of Summer 2026 to a project in Computer Science, Physics, or Engineering and posted it on LinkedIn. 7 Projects were made in 7 weeks - Created custom transformer from scratch using Python and Numpy without Tensor Flow or PyTorch in Week 4. The transformer consisted of 105K Parameters, 10 Char context window, 64 dimensions, 2 attention heads, and 2 layers. - Developed Offline AI ChatBot with custom Wikipedia vector embedding RAG system, local knowledge graph that visualises relationships between topics, and Ollama API in Week 6 using Python, Fast API, React, TypeScript, Vite, FAISS, and Tailwind CSS - Continued development on Sylvia2, my personal AI voice assistant, in Week 2 using Python, Fast API, React, OpenCV, TypeScript, Vite, Tailwind CSS, Node.js, SQLite, Whisper, and APIs to create a frontend interface for Sylvia, Camera and screen visualisation, and a custom memory system to mimic human memory	June 2026 – July 2026

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), JavaScript, HTML/CSS
Frameworks: React, Node.js, Next.js, Flutter, Tailwind CSS, Vite, FastAPI
Developer Tools: Git, GitHub, Google Cloud Console, VS Code, PyCharm, Cursor, Claude code, Railway, Firebase, Supabase, Vercel, Xcode
Libraries: PyTorch, Tensor Flow, NumPy, OpenCV, MediaPipe, Three.js, D3, Pydantic, Whisper
